Insulated Roller Doors

Insulated roller doors are an ideal solution for people who want to improve the appearance of their home and gain space in their garage. The doors open vertically with no 'kick out' of the door – this means you can park right up to the door on your driveway. With in-built automation, you can have the luxury and convenience of remote control as standard. As the doors are made from insulated aluminium profiles, they provide a thermal and acoustic barrier, helping to control your energy bills, reduce noise and possibly your carbon footprint.

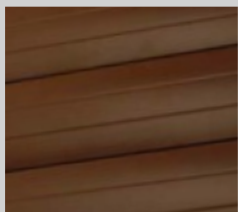

Finish Options

Polyester Paint Finish

This gives a smooth surface finish with a choice of crisp clean white or traditional double sided brown

White

Brown

Textured Laminated Woodgrain

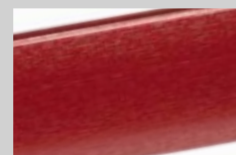

Hard wearing laminated woodgrain finish applied to the external surface of the door only, the internal surface of the door remains white. Twelve stunning colours to choose from including popular Rosewood and Golden Oak to match UPVC windows.

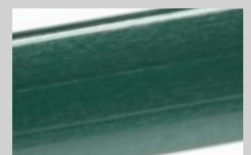

White

Natural Oak

Dark Red

Moss Green

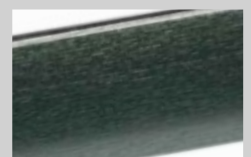

Cream White

Oak

Wine Red

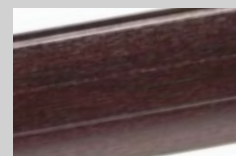

Dark Green

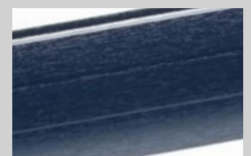

Black Ash

Golden Oak

Rosewood

Steel Blue

Specifications

Safety Cover

Supplied and finished in white as standard, protects the user from accidental finger entrapment and provides an attractive finish to the interior of the door.

Manual Override

A connector and crank handle are supplied as standard, so your door can be opened from inside, even during a power cut.

Guide Rails

Guide rails made from 90mm aluminium profile with a white polyester powder coated finish.

Safety Edge

Supplied as standard. At the bottom edge of your door is an emergency sensor which will stop and reverse when it senses an obstruction.

Weather seal on the bottom slat of door.

Built-in interior light on control box.

Insulated lathe provides a thermal and acoustic barrier.

Safety

Certified to the high safety requirements and performance characteristics of European Standard EN 13241-1, our Insulated Roller Garage Doors are fitted with a full Safety cover to prevent accidental finger entrapment and to cover the door curtain. In the event of an obstacle impeding the door entrance the Safety Edge will stop and return the door to the open position.

Security

Manufactured with built in autolocks. When the door is closed a spring clamp device holds the door down tight.

Convenience

An ideal solution for people who want to gain extra space in their garage, requiring only 30cm x 30cm of head room space. Opening vertically so you can park your car up close to the garage door and push button automation makes it so easy to open and close your garage door.

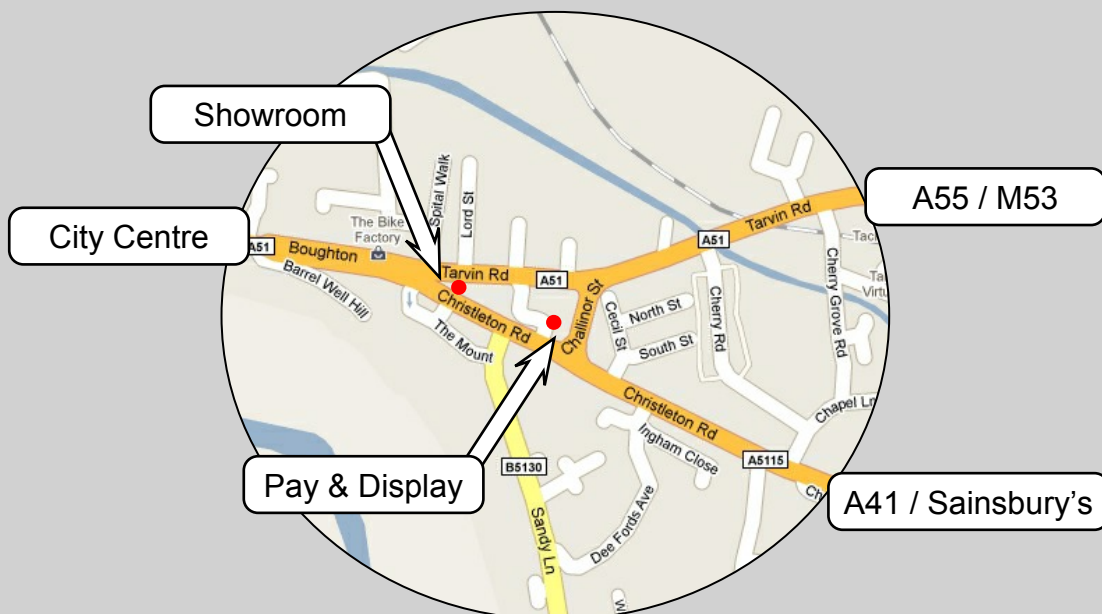

Insulated

The insulated aluminium profiles provide a thermal and acoustic barrier, which could reduce your energy bills, reduce your carbon footprint and provide noise reduction.
