# Carports and External Canopies

The Henderson external carport system has been chosen for its strength, design and durability to give a trouble free easy maintenance product. Manufactured from PVC and aluminium extrusions in a choice of colours, the system has the ability to incorporate various types of roof glazing from 16mm to 35mm poly carbonate as well as glass. Installed by our own professional fitting teams to exacting standards, you can be sure of a product that will last and serve you well.

Covered Play Areas

Our standard structure consists of a white finish with 16mm poly carbonate roof panels, white aluminium support legs with mounting plates and matching white guttering. A site survey will always be carried out to ensure the correct roof is specified, with any additional options added if required to provide the best solution for each application.

Roofs are manufactured to allow an additional snow loading of 60Kg/m when glazed. With a maximum bar deflection of 35 mm.

Front support rail in extruded aluminium with attachments for guttering. Various dimensions depending on roof load.

Cross support beams in extruded aluminium, with inserts for gasket seals. Clad in U.P.V.C. capping.

Secure anchor plate fixed to floor with options for sinking underground and concreting.

Obstructions can be easily overcome with infill panels.

A mounting back plate ensures the unit can be mounted to most substructures

Choice of poly carbonate with a solar reflective option.

Unusual mounting and angles are possible.

Once installed the roof will provide protection from the elements as well as U.V. with the appropriate finish.

Optional side infill's available to provide a horizontal mounting structure. Ideal for blinds or roller shutters.
