Side Slide Insulated Sectional Garage Doors

Side Slide Insulated Sectional Doors

Insulated side slide sectional garage doors provide exceptional performance when it comes to insulation, draught reduction and security.

The doors open horizontally, running on an extruded aluminium track mounted behind the lintel and running down the side of the garage wall. With no 'kick out' as per up and over doors, you can park right up to the outside of the door.

Somfy automation gives you the luxury and convenience of remote control as standard with the added function of partial opening at the press of a button for pedestrian only access.

As the doors are made from insulated steel profiles, they provide a thermal and acoustic barrier, helping to control your energy bills, reduce noise and possibly your carbon footprint.

Safety

Fully compliant and certified with all safety regulations our doors feature the Somfy Dexxo Pro motor unit with built in obstacle protection. The motor unit can also be upgraded with photocell protection to halt the door before the door comes into contact with an obstacle for extra peace of mind.

Surface Finish - Low Maintenance

Different panel designs have different colour choices at no extra cost such as White RAL 9016, Anthracite RAL 7016, Black RAL 9005, Rosewood and Golden Oak to compliment UPVC windows and doors. Should these colours prove to be not quite what your looking for then we can also powder coat to any RAL colour or B.S. reference such as Chartwell Green (P.O.A.) The timber Okoume clad doors can be stained or painted to suite your requirements.

Security

40mm panels are manufactured from double skin steel sandwich with an environmentally friendly foamed polyurethane foam core. These panels are then joined together with steel hinges and held captive from the top track. This produces a strong non-flexing door that easily deters would be intruders.

Special Designs

By cladding the front of the standard steel panel with 12mm thick Okoume hardwood it is possible to router custom designs and motifs into the front face of the garage door.

Specifications & Options

Somfy Dexxo Pro 800 RTS motor. Complete with courtesy light to aid parking.

Two, Keygo four button remote control handsets are included with the door.

Heavy duty aluminium rail with twin rollers ensure smooth and reliable operation.

Low profile threshold provides smooth movements and easy maintenance.

Nylon brush seals to reduce draughts.
