

PORTCHESTER®  
ALUMINIUM SECURITY  
SHUTTERS

# STYLISH LOOKS UNDER LOCK AND KEY

It's no secret that plantation shutters offer an elegant finish to any interior. And now, with the Portchester® range from S:CRAFT, shutters provide you with the added benefit of security.

Crafted from architectural grade aluminium, Portchester shutters have all the style and functionality of our existing plantation shutter range, with the additional advantage of intruder resistance. Look closely and you'll notice one more important difference – a lock and key!

# REASONS TO CHOOSE S:CRAFT PORTCHESTER SHUTTERS

The robust aluminium Portchester® range offers the perfect solution for homes, shop fronts, industrial units and commercial spaces where security may be a concern. These functional shutters offer an additional layer of protection against intruders.

## Security with style

Portchester aluminium shutters provide peace of mind without any compromise on style.

## Quality and choice

CE quality certified, every shutter is custom crafted with great attention to detail throughout the manufacturing process, ensuring the highest quality standards. Colour choices include satin white, light grey and charcoal, or a custom option if you are looking for a specific shade.

## Secure plantation shutters

Once locked, the louvres can still be operated but the shutter panels can't be opened. If you want to keep your windows open at night, you can rest soundly knowing that your possessions and loved ones are safe.

## Peace of mind

For rooms or buildings that may have already experienced a break-in, Portchester shutters offer a stylish yet practical solution to put your mind at ease.

## Indoor and outdoor solution

The flexibility to use these shutters both indoors or outdoors provides endless security options.

## Architectural grade aluminium

High quality metal gives excellent corrosion resistance and workability. This commercially pure aluminium is renowned for its superior strength.

# WHICH SHUTTER STYLE?

The S:CRAFT Portchester® range provides the perfect balance between security and elegance. Operating just like our other ranges, these shutters are available in our most popular styles.

The versatility of this product provides a host of practical benefits that makes them perfect for a variety of uses throughout the home.

## Full height

Simple and elegant, full height is our most popular style, giving a real sense of scale and creating clean lines from top to bottom.

## Tamper-proof locking system

Patented Italian strip proof lock, offering a high degree of resistance to both forced entry and surreptitious entry from the outside.

# THE ULTIMATE IN SECURITY AND STYLE

Delivering safety and style in equal measures, Portchester offers an additional layer of window protection if you want to enhance security, but don't wish to compromise on elegance.

## Tier-on-tier

By operating the top and bottom panels independently, you have ultimate control over the light, the view and your privacy.

## Built-in durability

Incredibly secure top and bottom guide system preventing the panels being lifted out of the channels. Extremely strong assembly ensures maximum security and long-term structural integrity of the panels.

## Versatile by design

A silent tilt mechanism allows the louvres to be operated by hand, creating a sleek and modern design with elegant contours and clean doors.

## Tracks

The stability of a track enables you to create stunning finishes on larger windows and openings, combining multiple panels in one smooth motion. Choose between bi-fold or by-pass.

## Complete privacy and light control

The 89mm louvres allow natural light in, but keep unwelcome attention out.
