Insulated Side Hinged Garage and Personnel Doors From Henderson

Side Hinged Garage Doors

Insulated side hinged garage doors are an ideal solution for people who want to retain a more traditional appearance to their garage door.

The doors are mounted onto a sturdy steel mounting sub frame which is galvanized and colour matched to the door leaf.

The actual door leaf is constructed from energy efficient insulated panels consisting of double steel skin with PU foam filling which has a U-value of 1.5Wm²/K.

As the doors are made from insulated panels, they provide a thermal and acoustic barrier, helping to control your energy bills, reduce noise and possibly your carbon footprint.

Design

Any of the insulated panels can be manufactured into side hinged doors, they can also be tailored to suite your particular design requirements for instance mounting panels diagonally or even mixing wood laminate panels with paint panels.

Convenience

When specifying your door we can alter the size of the door leaf to suite the use of the garage. A 50:50 split is commonly used where a vehicle is stored in the garage, where as 65:35 split is used when the garage is a workshop, or store room.

Surface Finish

Depending upon panel design there are many standard stunning colours to choose from including popular Rosewood and Golden Oak to complement UPVC windows and doors. Frames are always colour matched and in the case of wood look alike they are as close a possible to the base colour.

For a small charge it is possible to paint the doors to any RAL colour and also have different frame colours to the actual door leaf.

Surface Texture

Again depending upon panel design there are choices for the type of texture on the front of the door leaf. Woodgrain is popular where there is a chance of sustaining scratches due to high traffic or being used as a goal by children etc as it is very easy to touch up.

Smooth surface finish looks very contemporary especially when in a modern colour such as anthracite and combined stainless steel handles.

Specifications

Threshold

Available in four designs depending upon the use of the garage, type S4 being the preferred one for vehicle access.

Fittings

The mounting frame is available in two configurations and provides mounting points for door closer's and locking mechanisms.

Door frame can be ordered with or without edging.

Easy fitting to side walls.

Side doors are equipped with sliding door closer's.

Standard handles in: silver, black, white. Other colours upon request.

Without edging

With edging

Georgian design with 2/3:1/3 split and white handle
